History

The Crea-t Centre Foundation was born in May 2018, as a non-profit foundation of general interest. The objective is to support the integral development of those in educational, health and social fields, prioritising inclusion and being human despite any differences.

The founders started it as an initiative 'Crea-t Centro de Psicomotricidad' (2007). Now it has over 23 years of experience in the psychomotor skills field and 13 years as a centre.

The Crea-t Centre Foundation is a project by the community, for the community, including everyone from an individual and social perspective. It is a project of listening, respect and accepting others as they are. Covering all stages of a person's life: childhood, adolescence, adulthood and maturity.

Goals

To develop educational, social and supporting actions in the rural environment. Contributing to the recovery, conservation and enhancement of its heritage

Contextualising knowledge, experiencing learning in real environments and promoting the innate connection of human beings and nature.

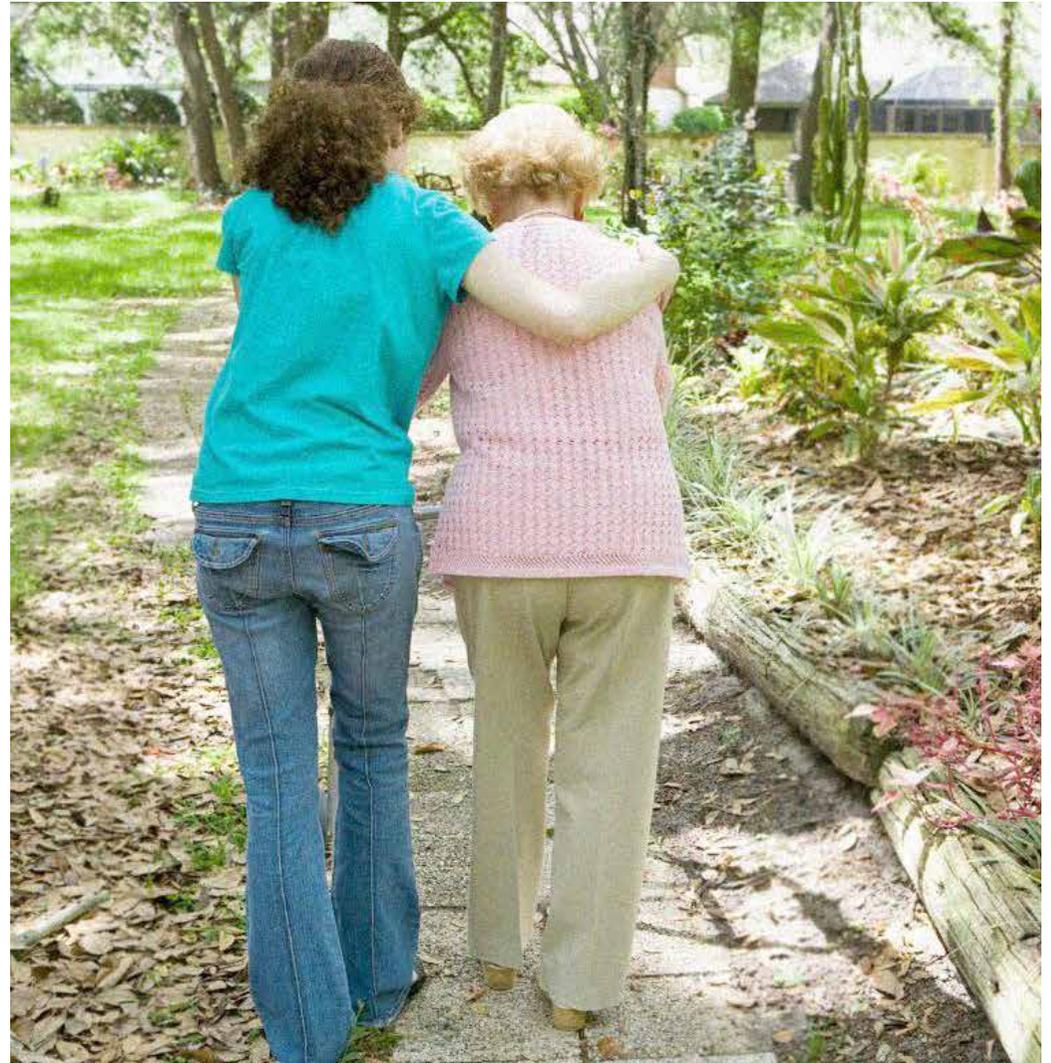

Attention to groups with specific needs: people with disabilities, people at risk and the elderly. Facilitating their accessibility, mobility and real inclusion.

We are talking about community. Opening up spaces to enjoy and respect together, creating intergenerational relations and proposing actions that transcend personal interests.

Pillars

1. Integral development of the person from a psychomotor point of view.
2. Observation, listening, learning, connection and respect for nature
3. Exchange with the community: creating a society aware of the importance of relationships and community services.
4. Inclusion of being human despite differences, with special attention to disability.
5. Evaluation and personal work.

Projects

Saudade: an approved, autonomous, inclusive and experiential school, open to the environment.

- Experienced to explore with all the senses, connecting with the reality that surrounds us.

- In connection with nature, because we live on Earth which is a living organism, a self-regulated being.

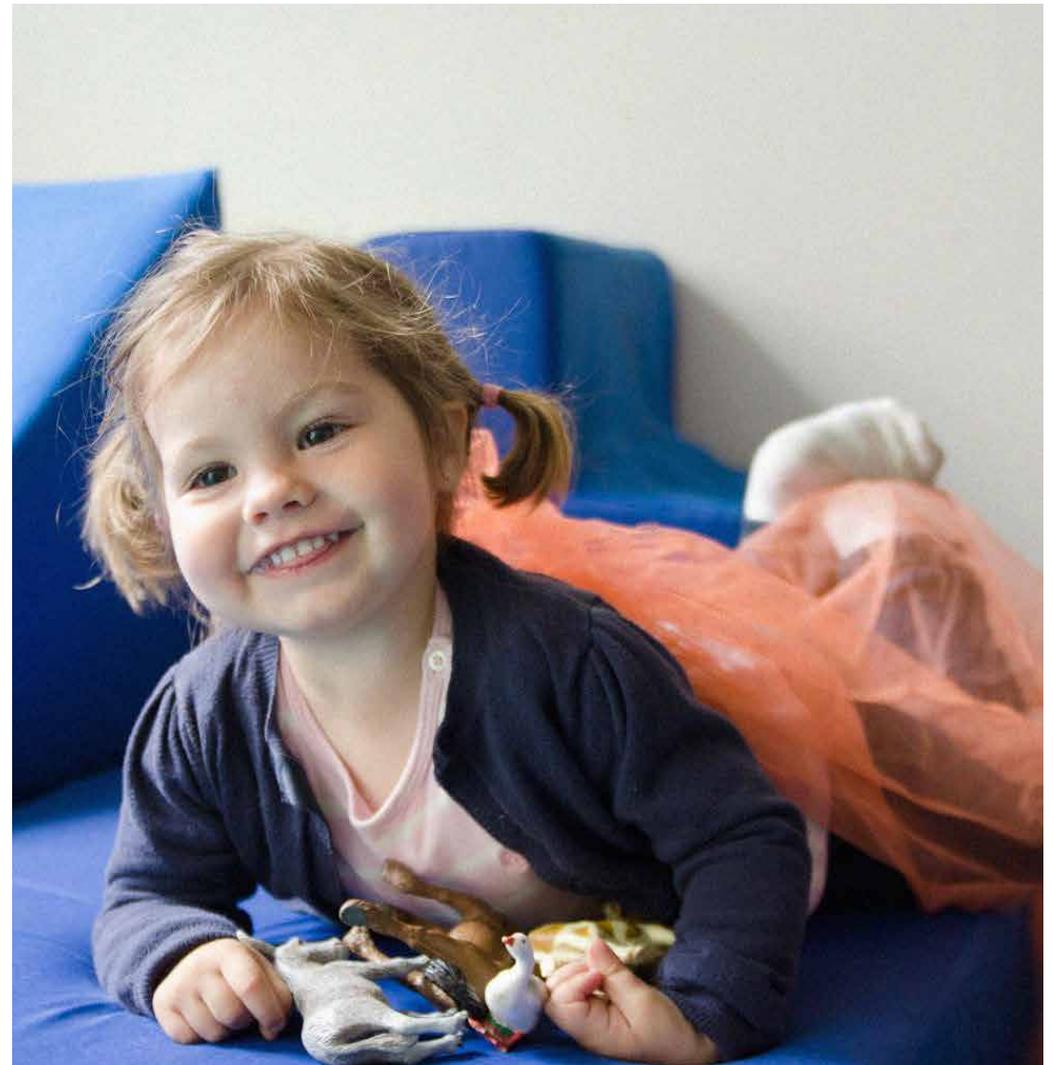

- Inclusive, to create a school where we can learn together, learn to live with our differences and learn from each other, without exception.

School of experiences for adults.

A quality space for older people, based on the methodology of psychomotor skills; and, at the same time, for exchange and relationship with children and families, where they feel an active part of the community.

Psychomotor skills; promoting recognition and scientific development.

This is a social and educational specialty that promotes the overall development of human beings. Including their expression and relationship with their environment.

2. Sa Cabaneta *Marratxi*

- Description
- Cost

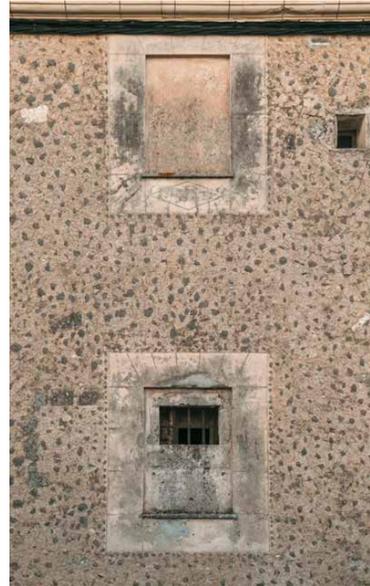

Sa Cabaneta

We are currently obtaining funds to sustainably rehabilitate a property located in Sa Cabaneta (Marratxí) where we can develop projects. Following our principles, we will respect the structure of the building and its peculiarity to preserve the native architecture and the environment. Also, to generate the least amount of waste and reduce our ecological footprint.

This is a 518 m² house with two floors and an annexe on the ground floor. It is located in an urban environment with protected green areas nearby (Son Caulelles area). We will be facilitating the connection with the community and developing of our activities in healthy environments. In addition, within the project we have included a sustainability report about the elements used to guarantee maximum sustainability.

We will avoid altering existing windows, doors and walls while maintaining natural ventilation systems where possible, as well as passive support systems that favour air renewal. In addition, we incorporate natural, native materials such as stone masonry and collect rainwater to re-use.

Low consumption systems will be incorporated to reduce water consumption. We will also take advantage of solar energy through the installation of photovoltaic panels and the combination of air renewal and aérothermal systems that have high levels of energy efficiency.

The building and its exteriors will be totally accessible, including ramps and a lift that will allow everyone to easily move around.

Finally, the basic project has been presented to the Marratxí Town Hall to obtain the building permit. Also, a file has been opened (no. 15/20) at the Balearic Government's Department of Education to obtain approval as a nursery and primary school. In November, the Regional Ministry issued a favourable report on the establishment of the school.

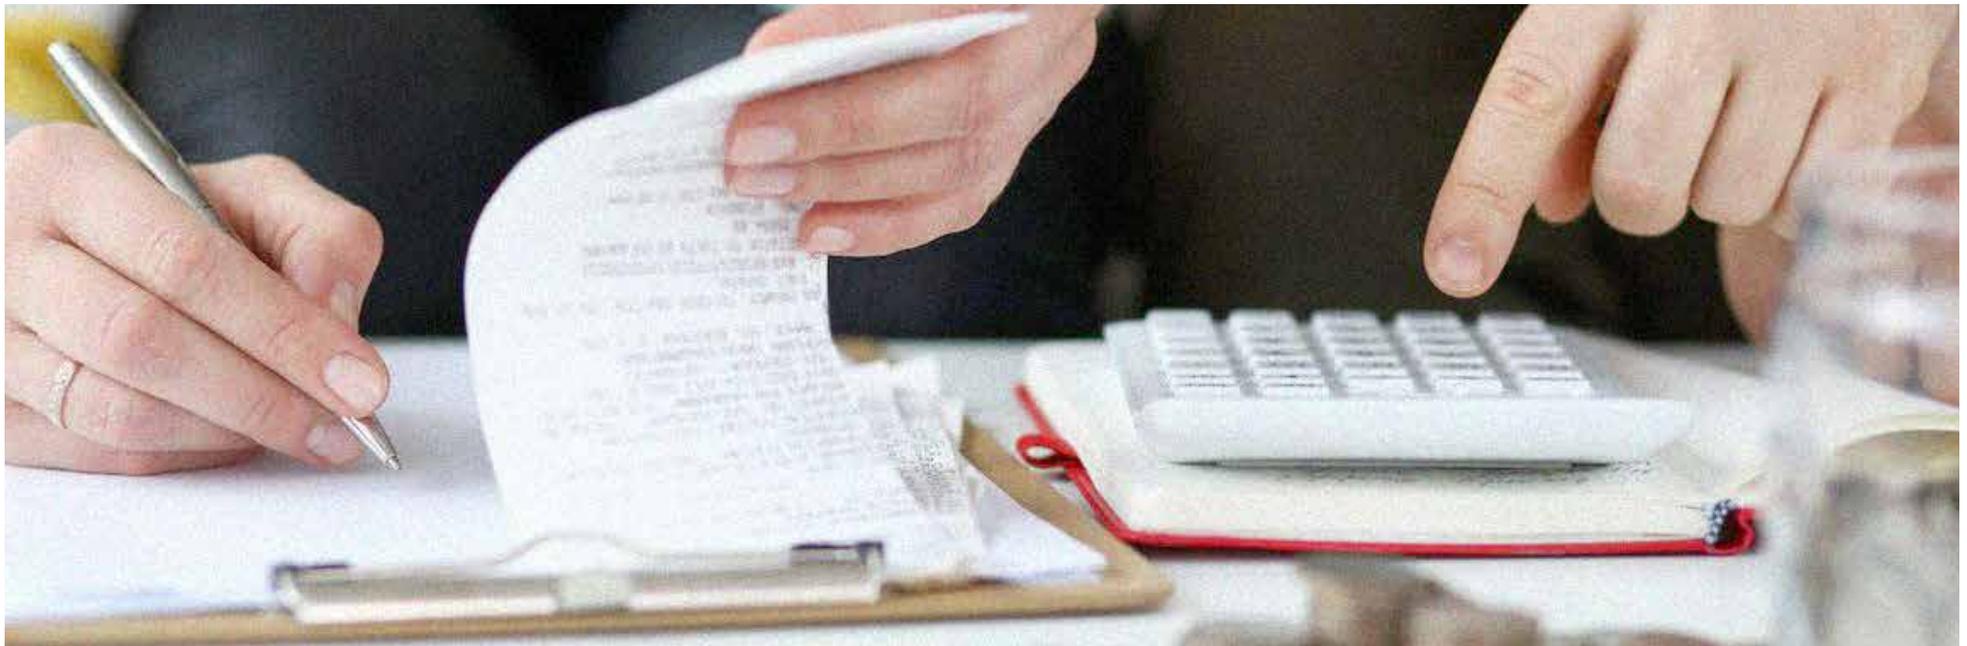

Premises:

- Nursery School Classroom
- Three Primary Classrooms
- Psychomotor skills rooms
- A Creative Expression classroom: paint and clay
- Public library
- Garden and orchard
- Toilets, three offices and a warehouse

Costs

Demolitions, structure, foundations.....	167.700€
Facades, roofing	135.450€
Wood, security, lift and cladding.....	290.250€
Waste management, quality and safety.....	51.600€
TOTAL COST.....	645.000€

3. Jumbo Tours Group

What is the role of Jumbo Tours Group within the project?

The role of the tourism sector: JTG

JTG collaborates with Fundación Centro Crea-t and formalises its commitment by becoming a friend. Launching fundraising initiatives through **clients, suppliers and colleagues in the tourism sector**.

It is time to think about our most direct environment, the people who build our tourist destination and how we can support **local projects** that improve our society.

Our elders, children and most vulnerable will be able to find an inclusive space in in Saudade, in connection with nature.

Let's join the challenge of the tourism sector so that together, we can raise the necessary funds for the building that will house this project, to build its foundations. **Shall we lay the first brick together?**

4. Donations

Would you like to support this project?

Would you like to make a donation?

Help create an inclusive, intergenerational space for all. Without exception. Allow people to live with diversity.

Trust in an education of knowledge, creativity and emotions (head, heart and hands).

Create active and quality spaces for our elderly.

Contribute to a local initiative in Mallorca and create a real learning community within nature.

Promote change; to be the change.
